It's Our Business to Protect Yours

FEDERATED INSURANCE®

Salary and Performance Management System

Legacy System

- IS Managers depending on an outdated legacy system while other department supervisors and managers manually handle salary and performance operations
- Needs to be converted to a new application because currently it is written in an older language which is no longer supported
- Currently tracks salary data, salary projections, and Compa ratios for their departments
- Our updated system will expand functionality to include performance management and salary
- Extended from strictly Information System departments to company-wide for everyone to have improved workforce oversight

Project Scope + Requirements

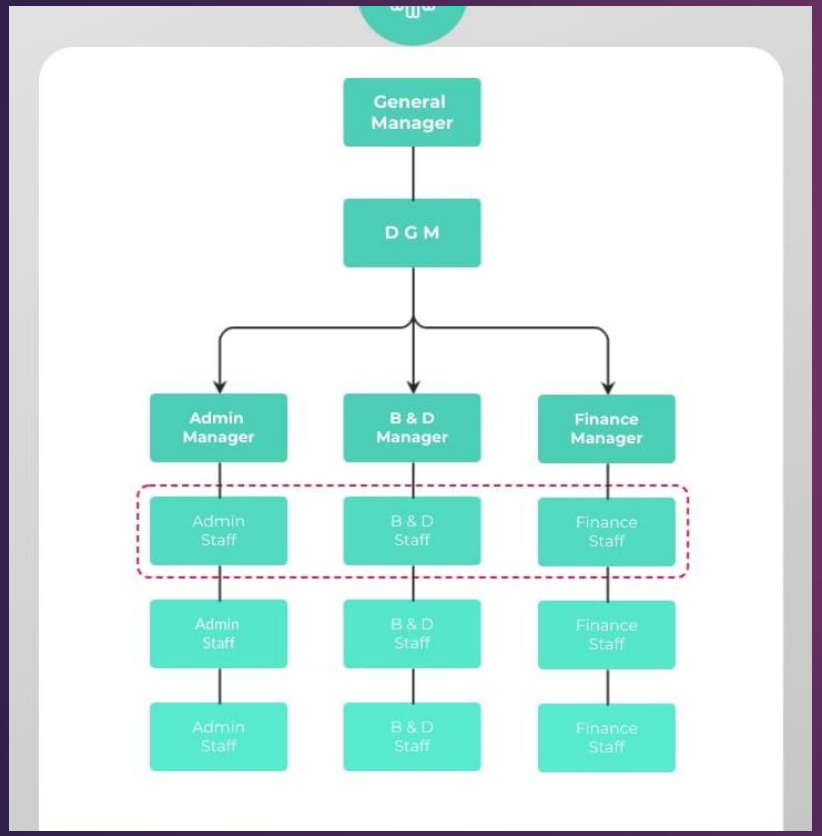

- Compares performance and salary projections and actuals.
- Enables flexible creation and editing of annual, quarterly, and on-demand performance review.
- Integrates HR database to maintain consistency.
- Allows managers and supervisors to compare projections against MERIT and PR Guidelines.
- Notification work-flow.

Project Scope + Requirements

- Accessible via mobile devices, laptops, and desktops, both remotely and within Federated Insurance offices.
- Easily incorporates annual updates to guidelines.
- System-generated reports.
- This system holds information for 5 years

Project Scope & Requirements

Support 3000+ employees with a yearly estimated 5% increase

Reassignment of employees to the correct manager/supervisor following transfers or promotions

Secure access controls

Out of Scope

BONUS

COMPA-RATIO CALCULATIONS

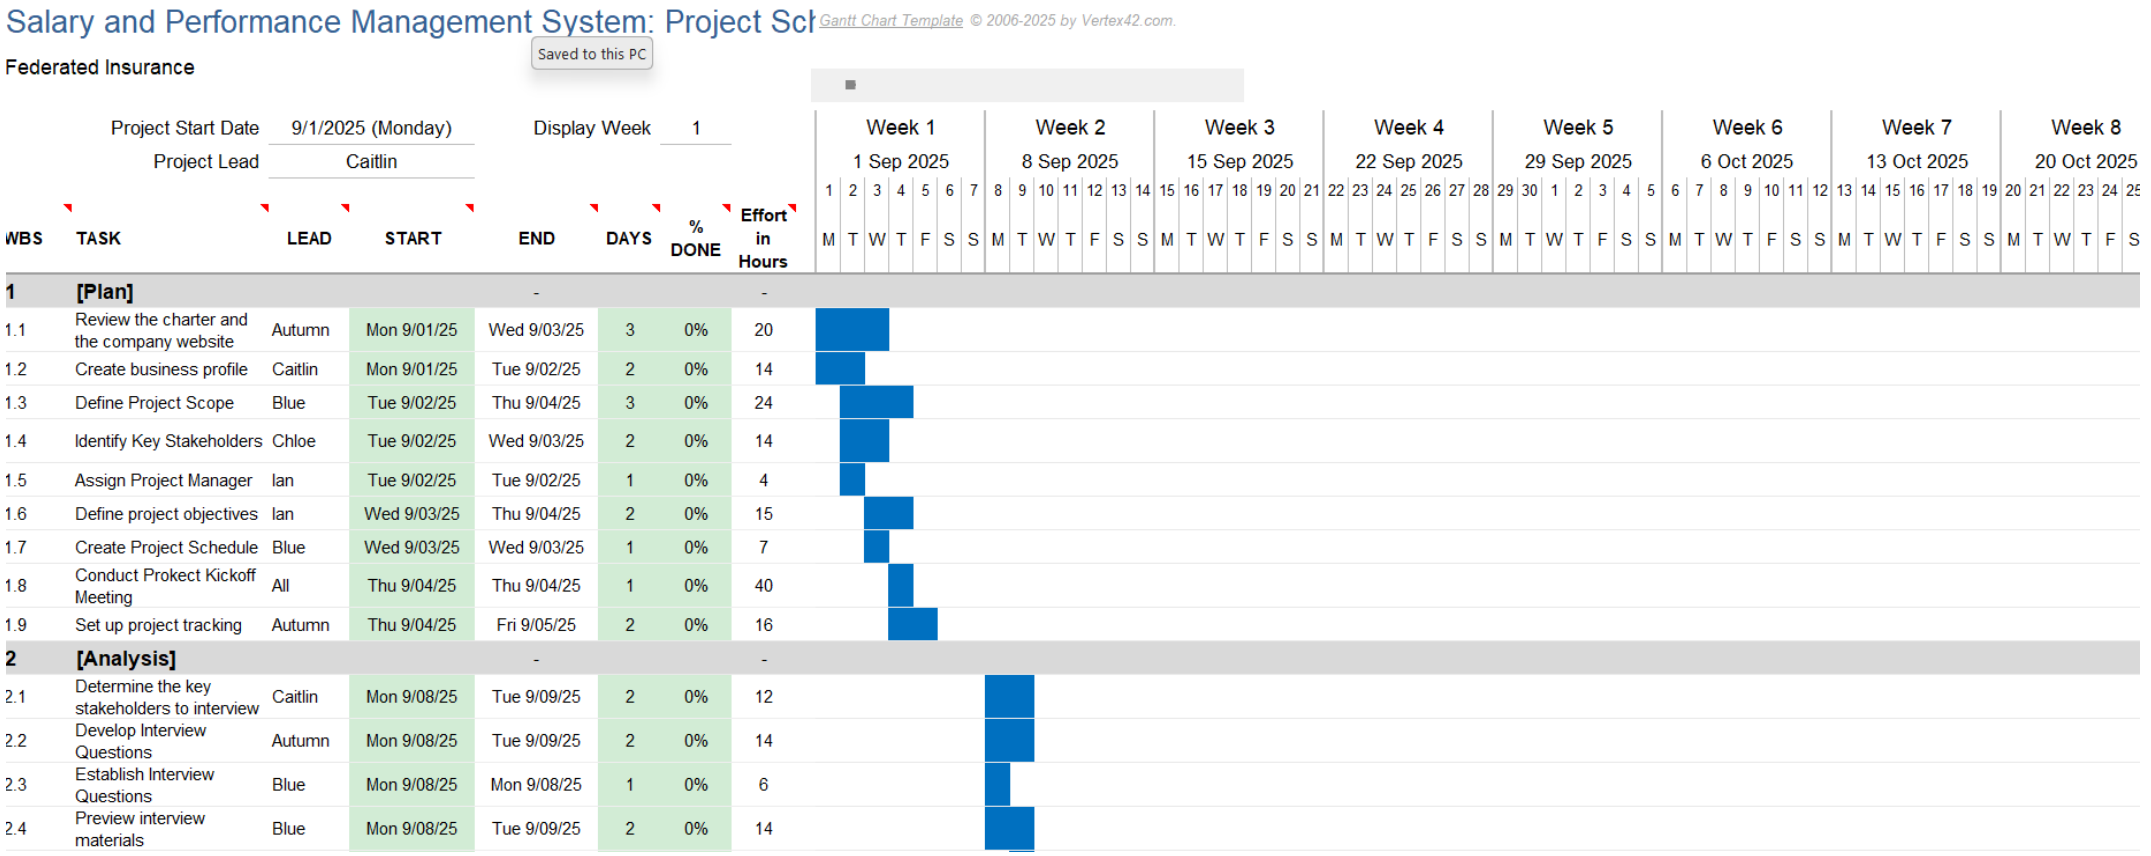

LEGACY “A, B, C” RATING SYSTEM WILL NOT BE SUPPORTED

DOESN'T REPLACE HR MODULES (BENEFITS, PAYROLL, ETC.)

Work Breakdown Structure

2.4	Preview interview materials	Blue	Mon 9/08/25	Tue 9/09/25	2	0%	14

Work Breakdown Structure

Our WBS consists of the phases Plan, Analysis, Design, Development, Implementing, and Testing.

We divided our tasks up based on each team members strengths in order to maximize efficiency and ensure each business requirement is met.

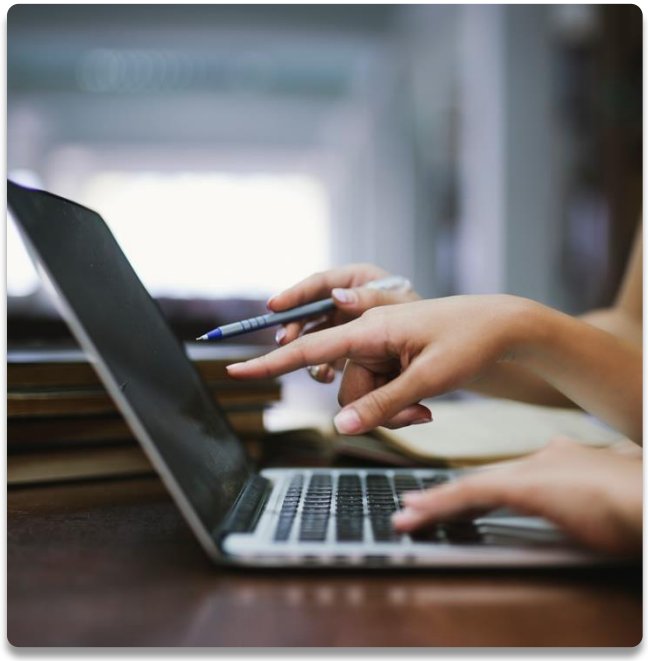

The project is projected to be completed within 4 months. Each member will work around 40 hours a week.

Planning Phase

WBS	TASK	LEAD	START	END	DAYS	% DONE	Effort in Hours	M	T	W	T	F
1	**[Plan]**			-			-					
1.1	Review the charter and the company website	Autumn	Mon 9/01/25	Wed 9/03/25	3	0%	20

Feasibility Analysis

- Operational Feasibility
  - The system will maintain usability and training will be provided for employees to ensure ease-of-use.
  - The proposed system will enable easier and efficient reporting of actual and projected salaries for management throughout the year
- Technical Feasibility
  - Federated Insurance has the necessary hardware, software, network resources, and technical expertise/skills required to operate the system

Feasibility Analysis

- Economic Feasibility
  - The projected outcome is higher than the Total Cost of Ownership
  - The amount of time saved due to the system will make employees more efficient with day-to-day operations
  - Estimated cost is $150,000 - $170,000 including hardware/software, employee wages, and training costs
  - This system will save……

$6,000,000

Schedule Feasibility

The system has been broken down into tasks that reflect the anticipated timeframe of 4 months.

Both internal and external factors pose little threat to the project's timeline. Each possible risk has been evaluated and plans to mitigate them have been drafted.

SWOT

Strengths

- Strong team communication skills that help drive the workflow
- Diverse technical skill sets
- Team collaborates efficiently within the group
- Tasks and work distribution is organized and planned thoroughly
- Proficient learners and quick to absorb new information

Weaknesses

- Schedule conflicts due to classes and meetings
- No prior experience in salary and performance management
- Limited coding experience with system development
- Difficult to orchestrate a larger team with efficiency and effectiveness

SWOT

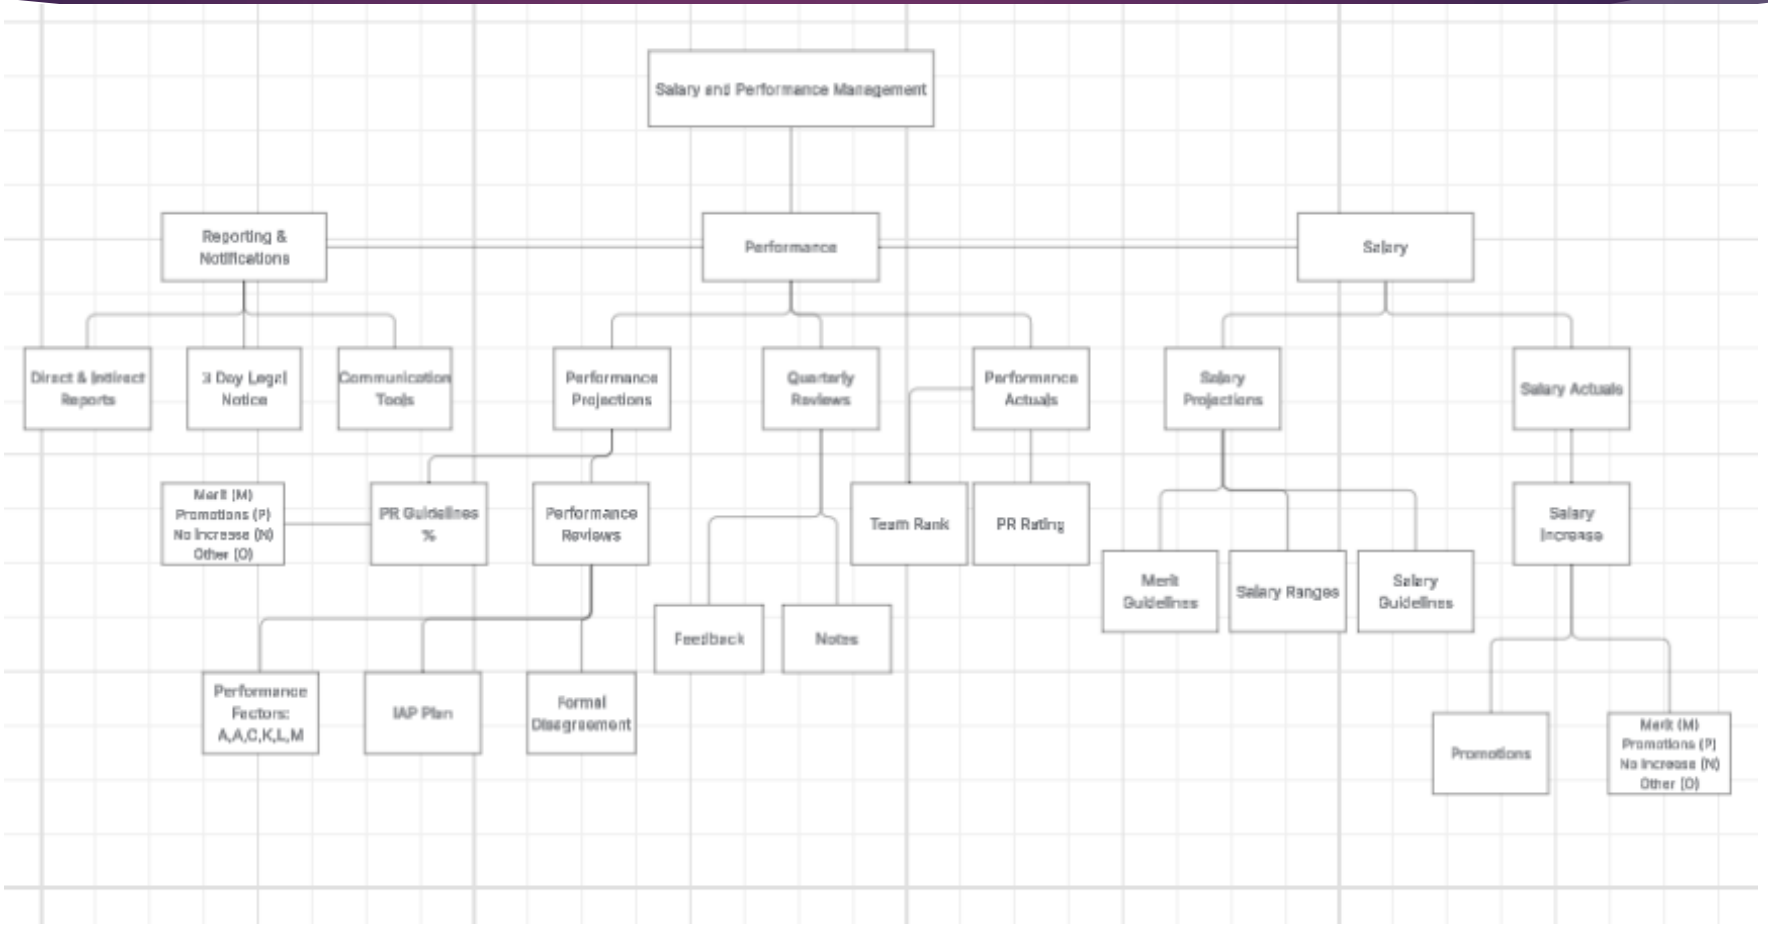

Opportunities

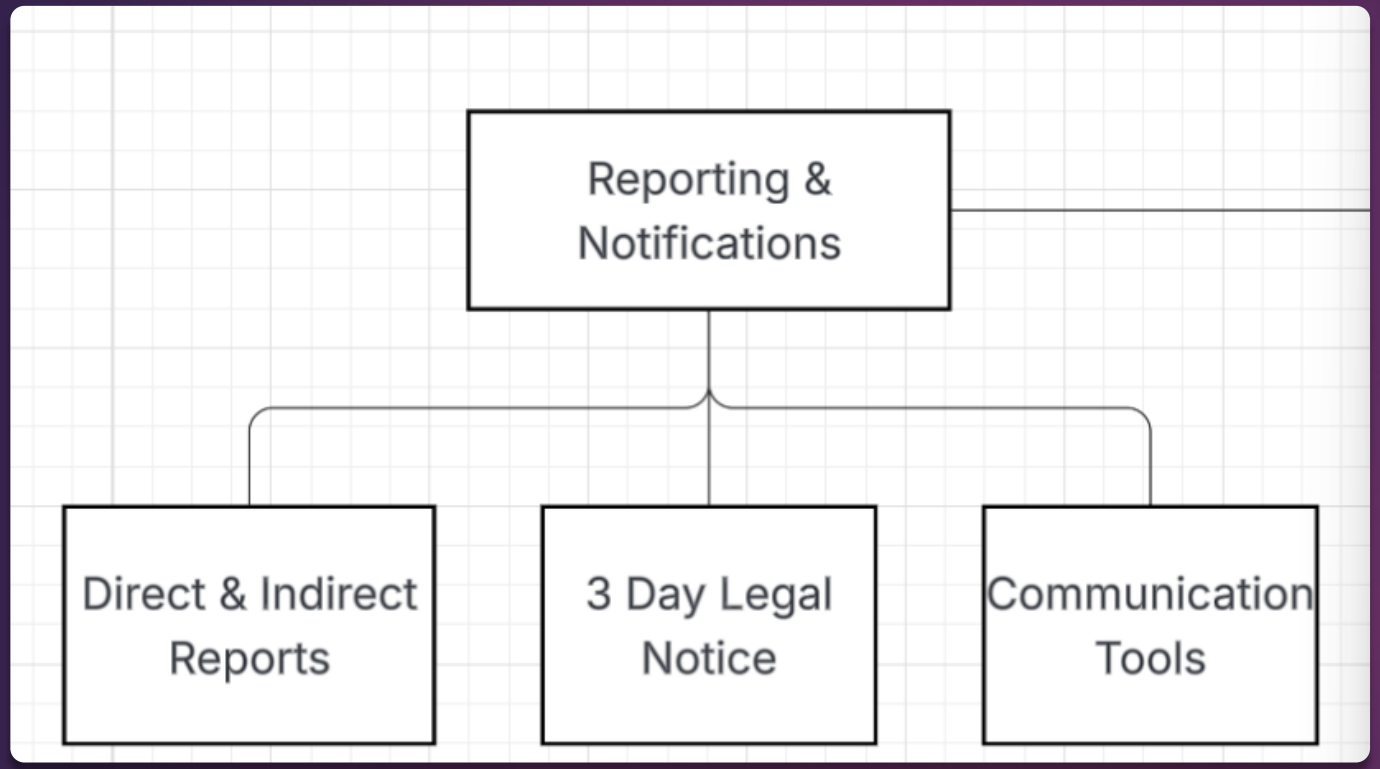

- Applying skills to real-world scenarios in future events
- Learning new skills from peers
- Making personal connections that could lead to future opportunities
- Build confident presentation skills that employers will value
- An automated system and resources that can be used towards other projects

Threats

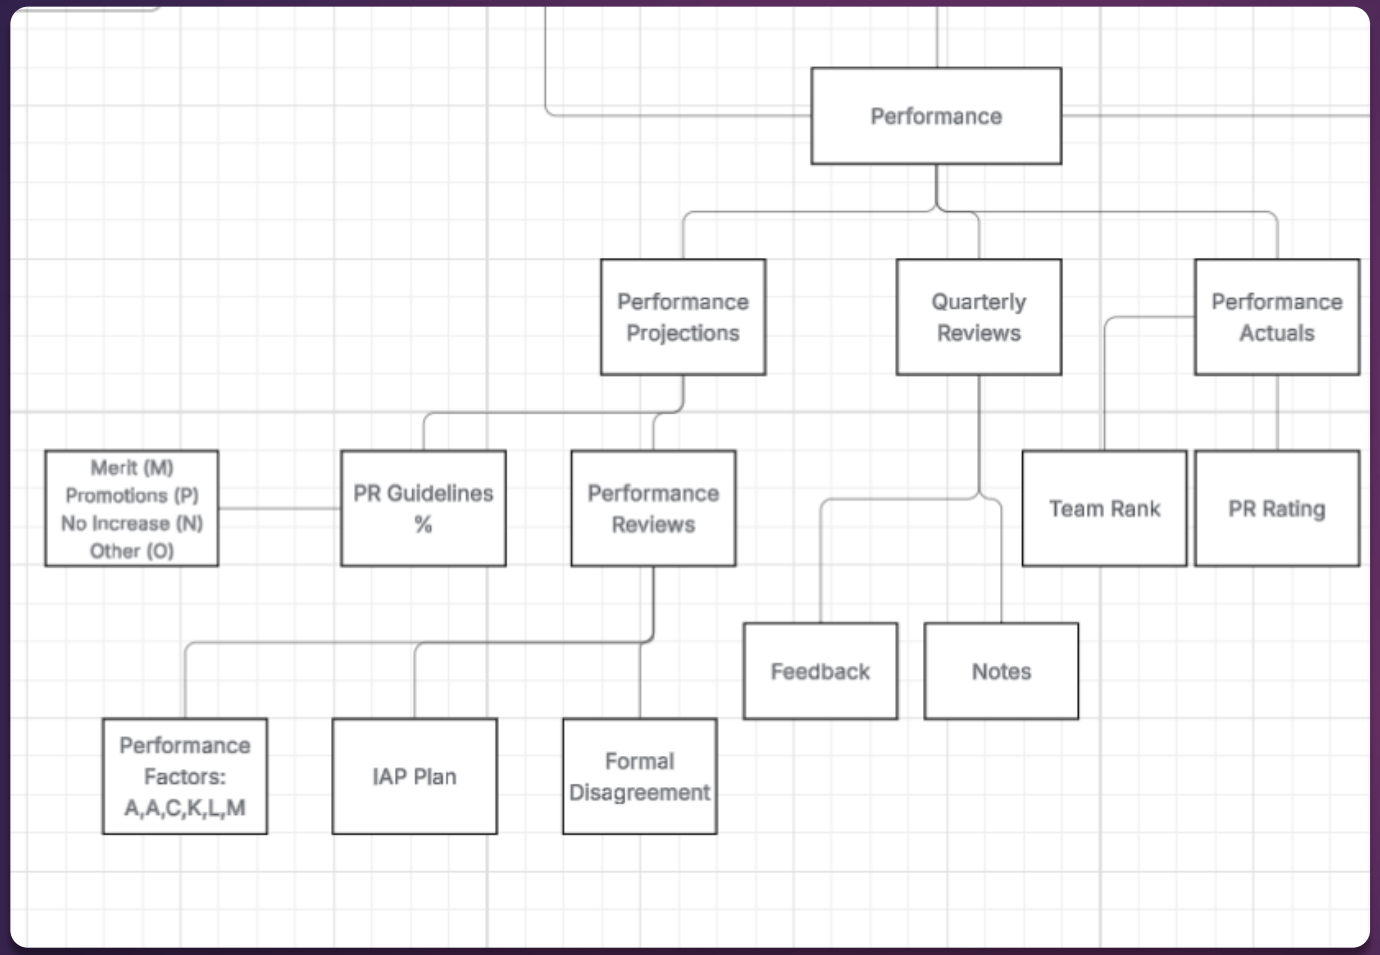

- Meeting goals and completing tasks within the given timeline
- Managing deadlines while balancing heavy workloads and multiple classes
- Miscommunication between team and external stakeholders
- Avoiding project creep to stay within budget and timelines, while meeting the business requirements
